Introduction

As the world continues to shift towards remote work, companies are increasingly relying on digital tools to keep their operations running smoothly. One such tool is the Tasks Management Dashboard, which enables teams to track their progress and stay on top of deadlines.

Working remotely on this project presented a unique set of challenges. Without the ability to collaborate in person with team members, it was important to create a dashboard that was intuitive, visually appealing, and user-friendly.

In this case study, we'll explore the design process behind this project, including the research that went into understanding the user's needs, the ideation and iteration phases, and the final product. We'll also delve into the specific design decisions that were made, and how they ultimately led to a successful outcome.

Research

Concept: Remote Employees/Freelancer Tasks Management

Target Audience: Employees and freelancers of age 20-60 of a company who work remotely or have a distributed workforce.

Benefits:

- Useful for companies that have employees located in different regions or countries and need an efficient way to manage their tasks and workflow.
- Convenient for teams that work from home or other remote locations, as it would enable effective communication and collaboration among team members.
- Helpful for companies that want to reduce their overhead costs by allowing their employees to work from home, while still maintaining an efficient and productive workflow.

Features: Task Lists, Task Assignments, Project Management, Time Tracking, Communication Tools, File Sharing, Analytics, Reminders & Alerts

Persona

“My goal is to create interfaces that not only look beautiful, but also function seamlessly. ”

— Emily Johnson

Background

Emily is a skilled UI/UX designer who specializes in designing and developing user-friendly interfaces for web and mobile applications. She has been working in the design industry for over 5 years. Emily is currently working remotely for a startup that is developing a task management dashboard for its clients.

Age	32
Occupation	UI/UX designer
Income	90K
Status	Single
Location	Los Angeles, CA

Goals

- Design an intuitive and visually appealing dashboard
- Create a user-friendly interface that can be accessed from anywhere.
- Explore new design trends and technologies

Personality

- Creative and detail-oriented designer who is passionate about creating user-friendly interfaces
- Enjoys collaborating and teamwork with others to achieve a common goal
- Able to work independently, taking initiative to solve problems

Frustrations

- Communicates with the development team, which is located in a different time zone.
- Make sure she is available for meetings and is able to collaborate effectively with the team.
- Stay organized and manage her time effectively to meet project deadlines.

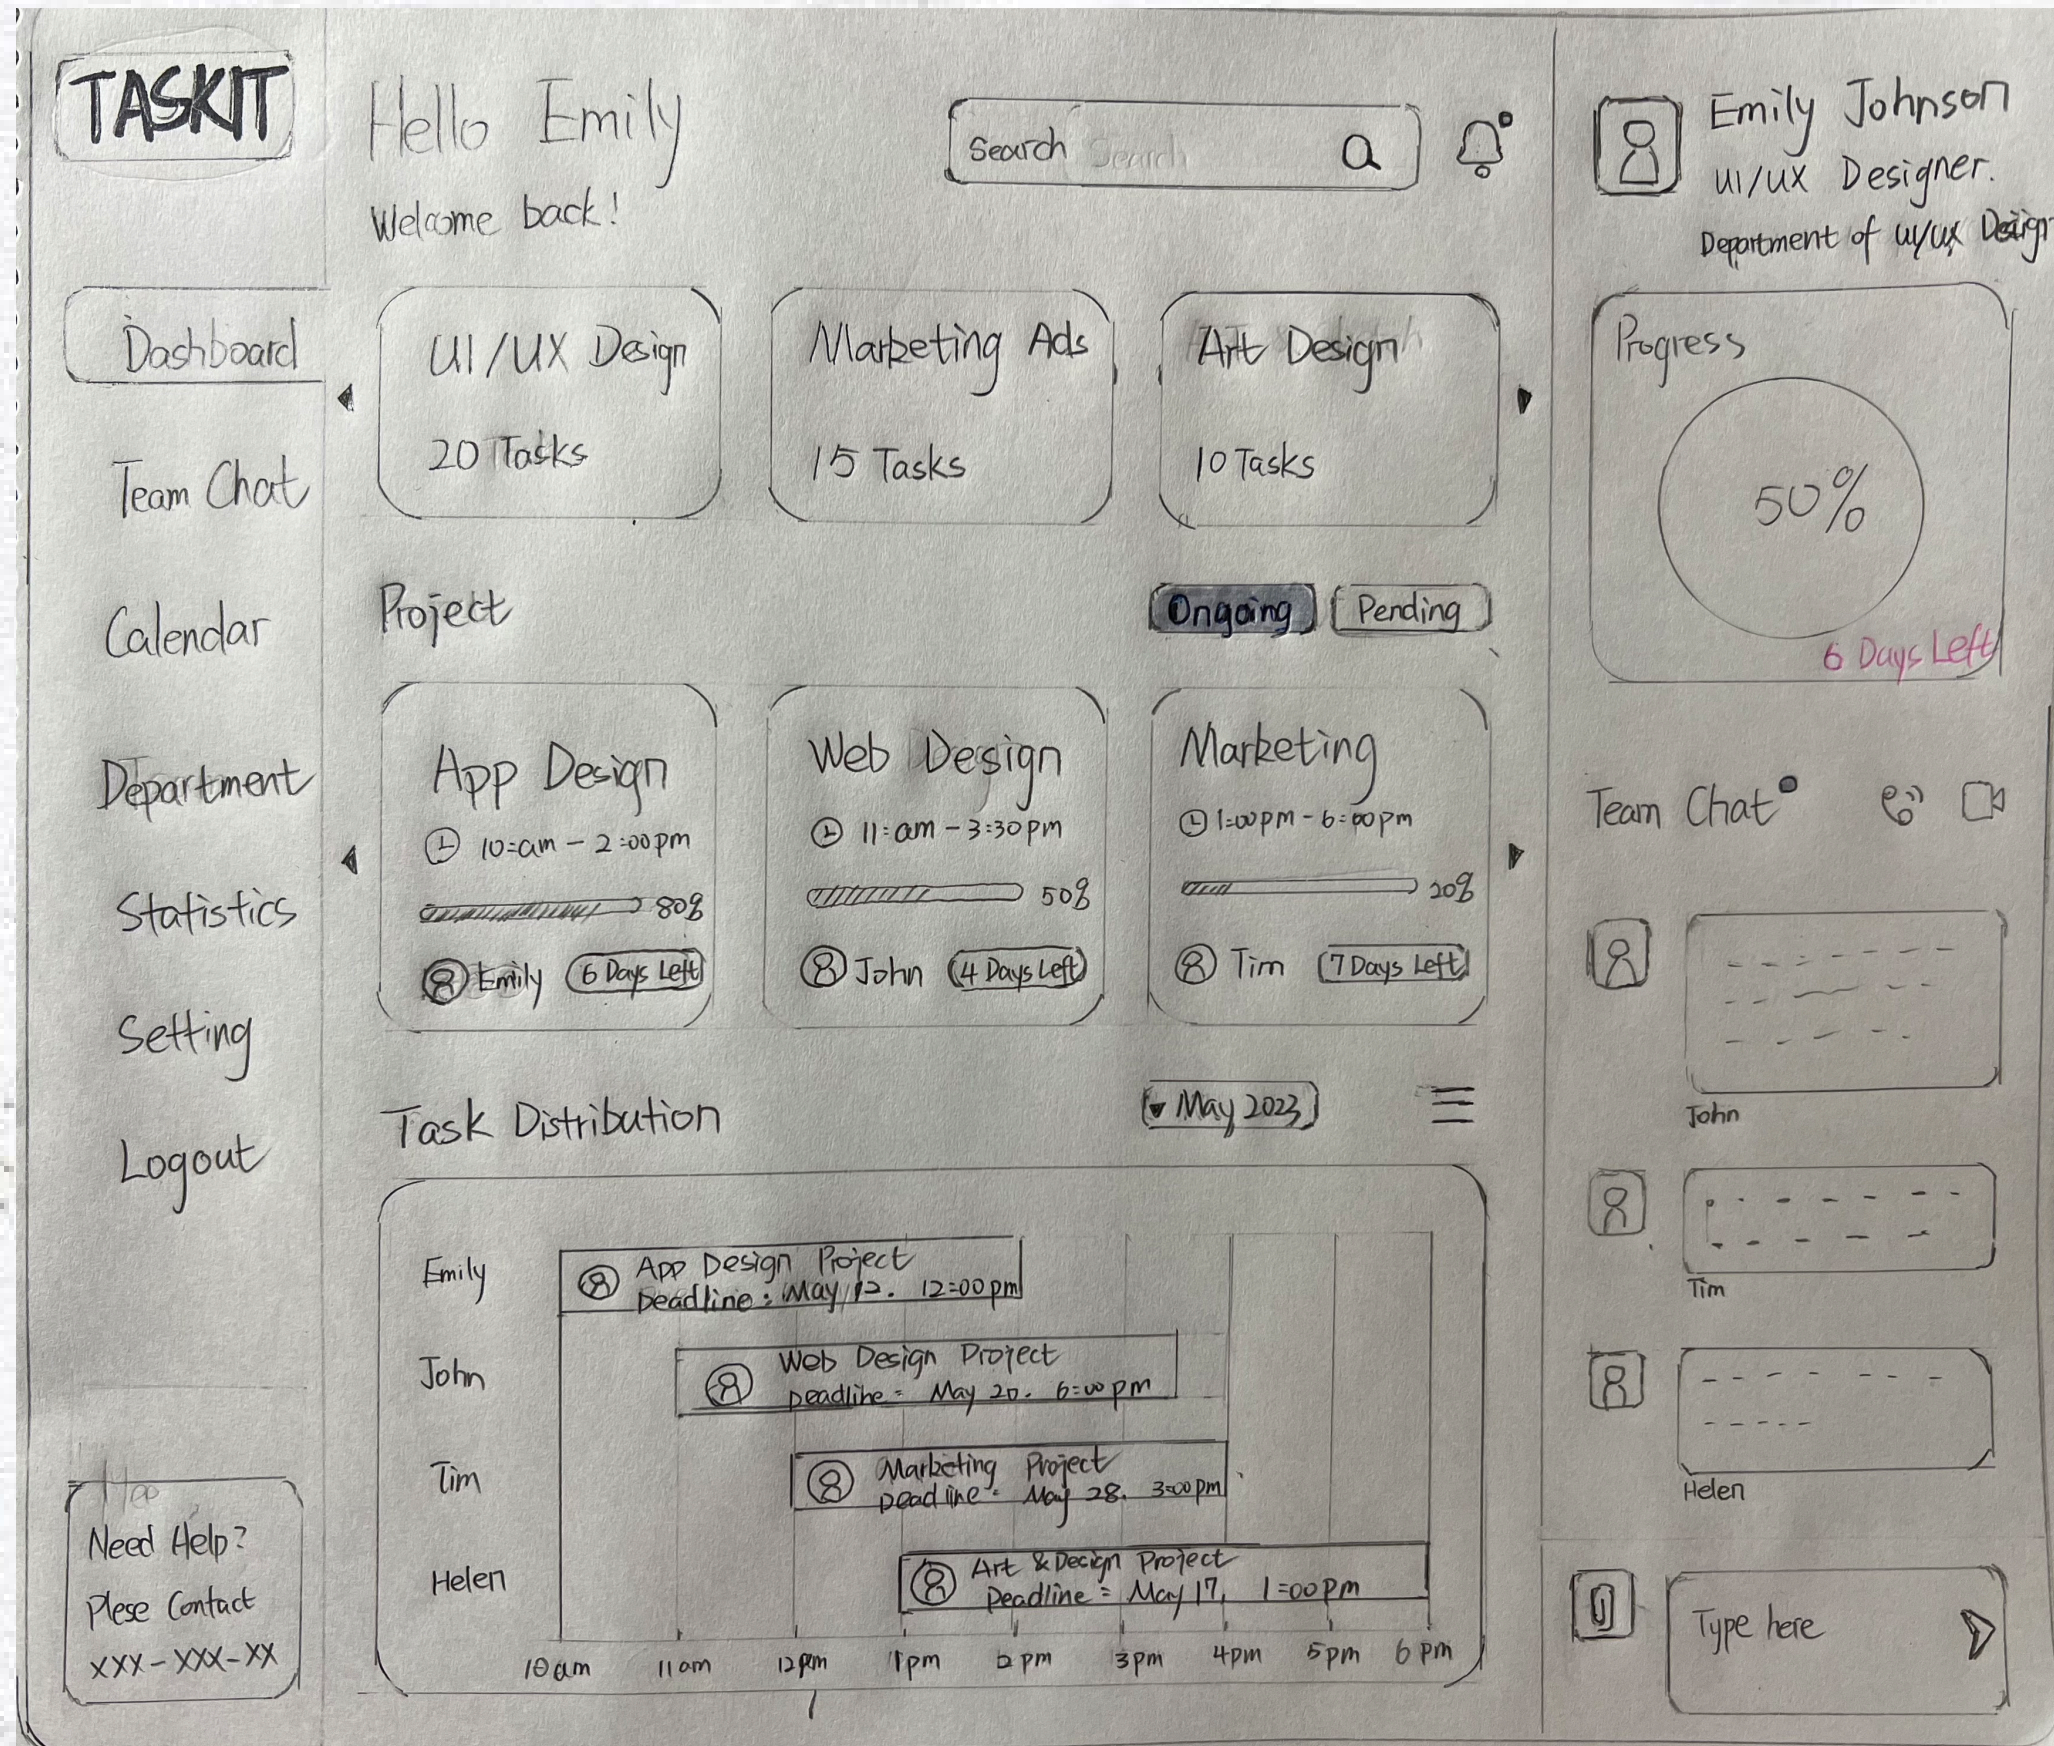

Technology

- Design Tools: Sketch,Photoshop, Illustrator, Adobe XD, Figma
- Coding Tools: HTML, CSS, and JavaScript
- Project Management Tools: Trello, Asana
